RhinoCoat

Total Surface Protection For Vehicles

What is RhinoCoat:

A Total Surface Protectant for vehicle surfaces infused with nano technology and silicones that leaves behind long lasting, deep color protection and incredible gloss. RhinoCoat offers a good level of protection alone, leaving a silica-rich film behind that helps repel water, dirt, and other pollutants, keeping your car cleaner longer in automatic car wash equipment. Use it on a non-coated car to add water beading properties, or on a coated car to revitalize the existing coating and protection.

What is Ceramic GUARD Technology?

A premium long lasting surface coating and UV protectant for vehicle surfaces using nano technology. This advanced coating bonds with the vehicles surface to provide long lasting protection. Surfaces have a deep reflective shine that make colors deep and vibrant.
